

Project Update: Clean Water for Buyinja Community

We are thrilled to share the successful completion of a new clean water well for the Buyinja community, Masaka District, Uganda. This project was made possible through the dedicated efforts of the Nyakitalaka Help Organization, with the generous support of Team Hill Charitable Trust.

The total cost of constructing the water well was **£1,800**. This well now provides safe and reliable access to clean water for dozens of families who previously walked long distances to collect unsafe water. The new facility is already making a life-changing difference — improving health, sanitation, and quality of life for children and families in Buyinja.

We extend our heartfelt gratitude to everyone who contributed to this project. Together, we are creating lasting change and giving hope to communities in need.
